

i dont think that the fcc should back expanding broadcast ownership. you know and i know this only casts more corporate control over the already too corportat media. we are not getting the news we need anyhow, they are feeding us what the general public wants to hear, not the whole two sided issue. most americans dont have the time to seach all around on the internet for sources other than tv. we need to be told the truth, not governmental ownership owned by beaurocratic lobbyist. make the right decision!
